

Change 2011-6, % adults white UK or Western European names

What has been the pattern of “white flight” in Birmingham since 2011, the date of the last census?

- This map shows where the population has moved to during the past five years in Birmingham
- Similar types of map can be made for any other part of the country
- Red indicates where white adults form a higher share of the population than they used to five years ago
- You can see how, in the last five years, there has been a trend for the BAME population to be forced out of the centre of Birmingham into inter war suburbs in particular
- Data is shown at the level of the postcode sector
